DETAILED ACTION

Allowable Subject Matter

Claims 1-34 are allowed.

Applicant's arguments, filed 10/29/2008, with respect the prior art rejection of claim 1 have been considered and have been found to be persuasive. As to independent claim 1, the prior art does not disclose or render obvious at the time the invention was made a needle assembly wherein after activation of an actuator and release of the abutting engagement of a lock, a retaining member engages and shield, and wherein the shield is prevented from moving to a fully extended position until the abutting engagement of the retaining member is disengaged from the shield. As to independent claims 19, 22, and 27 the prior art does not disclose or render obvious at the time the invention was made a blood collection assembly comprising a retaining member which holds a telescoping shield, wherein removal of a blood collection container from a needle holder causes the retaining member to disengage from the telescoping shield causing it to move toward a fully extended position.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CATHERINE N. WITCZAK whose telephone number is (571)272-7179. The examiner can normally be reached on Monday through Friday, 8-5 EST.
